Title

Disaster Management in Hospital Setup

Details

India has been traditionally vulnerable to natural as well as manmade disasters on account of its unique geo-climatic conditions. Although these may not be totally preventable but their impact can be minimized by effective planning. The loss of life and disability are compounded by the lack of adequate medical preparedness both qualitatively and quantitatively across the country. So this workshop intended to increase awareness to manage the outcome in staff nurses.

Category of Workshop

Knowledge Based Workshop

Target Group

For Registered Nurses

From

09/02/2018 09:00 AM

Till

09/02/2018 01:00 PM
